

POTD28.1. Problem of the Day #28

Download and Extract

An initial setup of files is provided to you via a shell script: [Download potd-q28](#)

Using a terminal, extract the initial files by running the shell script you just downloaded (you will need to navigate to the directory where you saved the file):

```
sh potd-q28.sh
```

Your files for this problem will be in the potd-q28 directory.

The Problem

Complete the member function `getHeight` in the `TreeNode` class. This function must return the height of the binary tree.

Example

In `main.cpp`, a simple test case has been created with a simple binary tree:

```
      n1
     /  \
    n2   n3
   /
  n4
```

Upload Solution

Drop files here or click to upload.

Only the files listed below will be accepted—others will be ignored.

Files

TreeNode.cpp
